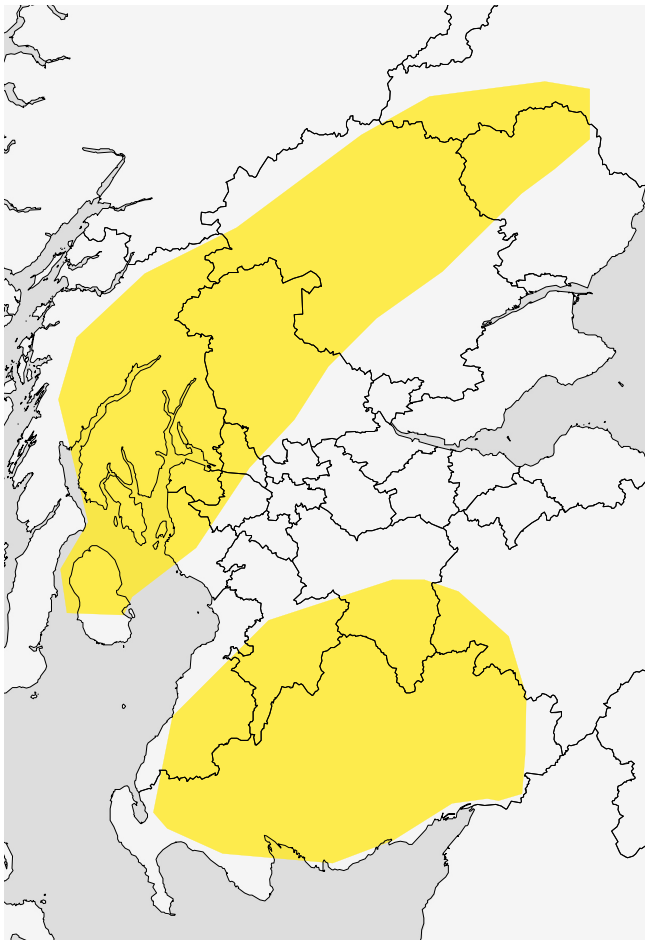
Yellow warning
Rain

Between
15:00 Wed 27 Sep 2023 and
23:59 Wed 27 Sep 2023



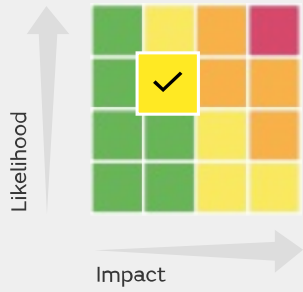
A period of heavy rain during Wednesday afternoon and evening may cause some flooding in a few places

What to expect

- Flooding of a few homes and businesses is likely.
- Some bus and train services probably affected, with journey times by road also taking longer with a chance of the odd road closure.

Further details

An area of rainfall, accompanied by very strong winds, is likely to arrive from the south on Wednesday afternoon with 30-50 mm, and perhaps in a few spots 60 mm, of rain building up on areas of higher ground within the warning area. Given that this is forecast to follow an already very wet period of weather which will not have had much time to dry out, as well as the fact that the strong winds could exacerbate any flooding by blocking drains and gullies with leaves and other debris, some flooding of roads and perhaps the odd property in very flood prone areas is possible. Rain will ease by the early hours of Thursday morning.



Medium likelihood of low impacts
